

“Leaves” necklace

Materials needed:

brown seed beads size 11
three shades of green seed beads size 11

Estimated time:

It should take 3-5 hours depending on your experience.

Instructions:

This necklace is done using netting stitch, which you should be familiar with. Start beading from any point of the necklace. The diagrams on the left give you patterns for different types of leaves I used for this necklace. You can incorporate as many leaves in your necklace as you want.

On the picture I you can see in details how I made ends of leaves pointy.

On the diagram below I am providing a pattern for an asymmetrical cluster of leaves. You can use it as well.
